# Azure Office Hour Fridays

@MikeBenkovich

05/04/2021

BenkoTIPS

**Thinking about going to Cloud?** I've been consulting around Azure for the last 8 years since I left Microsoft where I helped launch it in 2009. I want to offer my support, so I'm starting a thing called Azure Office Hours on Fridays, where anyone can block out 15 minutes to chat about anything Azure.

1. Find a time that works - <https://bit.ly/BnkAzHrs>
2. Let me know what you want to talk about
3. Let's chat!

I speak at conferences and have LinkedIn learning courses on Azure and DevOps including templating, compute, storage, messaging, networking and governance topics.

My [calendar](#) is open. Let's connect!

Comments

# Takeaways from today

How to go from **Idea** to **Cloud** App

Discover **Visual Studio** tools to build **Connected** Apps

Use **Resource Group** projects to manage cloud access!

Enable Continuous **Value** with **DevOps**

**Blueprints** create **Landing Zones** with **Cloud Governance**

# What is the "Cloud Journey"

An **Application** is an Idea

**Cloud** Application

Data

Code

+ Infrastructure

---

= Application

- Runs in a cloud datacenter
- Managed on virtual hardware
- Monitored
- Configurable
- Scalable

# I've got an idea!

My kids graduating...

Need guidance!

- Hard to be everywhere
- Words of wisdom help

Mobile Friendly

Reuse API Economy?

# The Dad App

## Web Application

- Mobile friendly
- ASP.NET Core Web App
- Calls API for Joke

## Configuration

## Monitored

## Keep it simple!

- Use existing tools
- Click to deploy
- Manage in Portal

# DEMO

Dad App Base Code

Visual Studio

2019

# Permit to Build

I've got an app, where should I run it?

# Cloud or On Premises?

On Premises

- Hardware Concerns
- Capacity
- Timeframe
- Capital Costs
- Security

Cloud

- On-demand provisioning
- Time savings
- Pay for use
- Choice of Services
- Maturity of platform

# Cloud App

What Compute should I use?

How do I Publish?

How do I do configuration & Settings?

Monitoring?

# To Deploy to Azure...

**TODO:**

My **Code**

An **Azure** Subscription

Create **Resource Group**

Give access to **Developer**

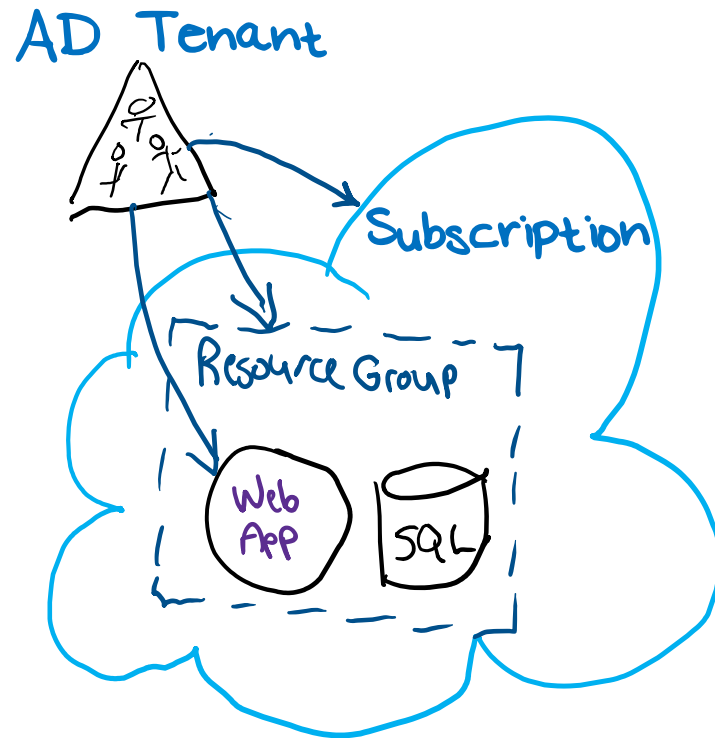

# Role Based Access to Azure

**RBAC** – Role Based Access Control

User in **Azure Active Directory Tenant**

Organized in Management Groups

- Tenant
- Subscriptions
- Resource Groups
- Resources

# DEMO

## Publish

Overview

Connected Services

Publish

### Publish

Deploy your app to a folder, IIS, Azure, or another destination. [More info](#)

 dad1206 - Web Deploy ▼

[New](#) [Edit](#) [Rename](#) [Delete](#) [Restore](#)

#### Summary

Site URL	<a href="https://dad1206.azurewebsites.net">https://dad1206.azurewebsites.net</a> 
Resource group	rg-bnk1206
Configuration	Release 
Target framework	netcoreapp3.1 
Deployment mode	Framework-dependent 
Target runtime	Portable 

#### Service Dependencies

There are currently no service dependencies configured.

Add

#### Continuous delivery

Automatically publish your application to Azure with continuous delivery. Click [Configure](#) to begin setup.

Configure

#### Actions

- [Preview changes](#)
- [Manage in Cloud Explorer](#)
- [Manage Azure App Service settings](#)
- [Manage in Azure portal](#)
- [View streaming logs](#)
- [Open troubleshooting guide](#)

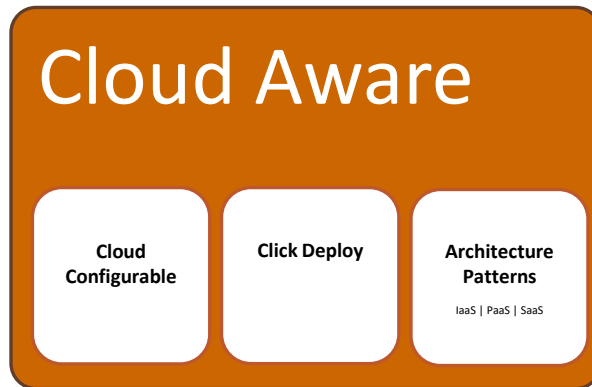

# Step 1 – The Cloud Aware App

## Features

- From Visual Studio
- Runs in the cloud
- Existing code, minimal changes
- Config settings in portal

## Concerns

- Repeatability
- Click to deploy
- Governance concerns

# Cloud Journey

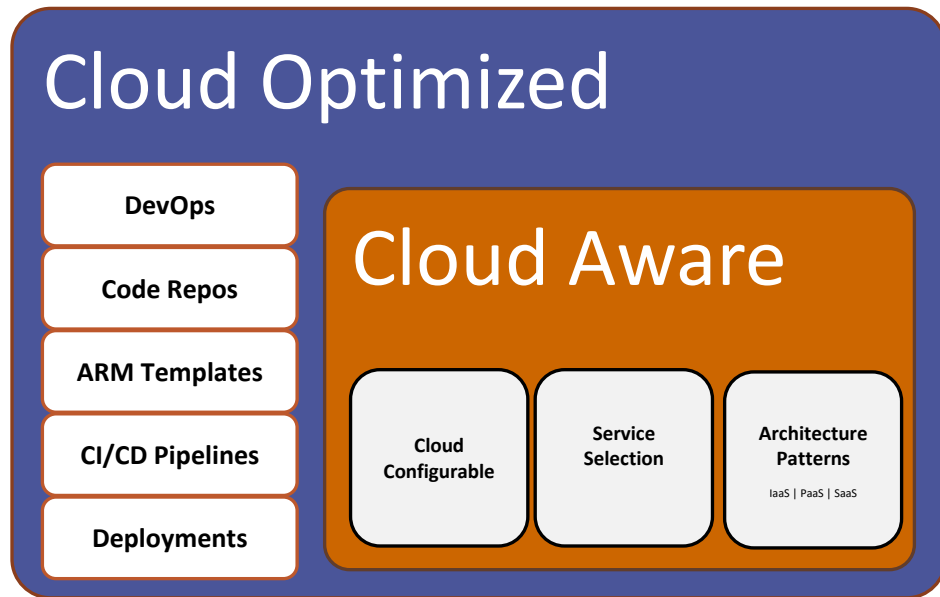

# Step 2 - Cloud Optimized

## Requirements

- Code Collaboration
- Infrastructure as Code
- DevOps Processes

# Cloud Resource Group Project

Infrastructure as Code

Templates for Services

Azure Resource Manager

## Create a resource group ✕

Basics

Tags

Review + create

**Resource group** - A container that holds related resources for an Azure solution. The resource group can include all the resources for the solution, or only those resources that you want to manage as a group. You decide how you want to allocate resources to resource groups based on what makes the most sense for your organization. [Learn more](#)

Monitoring and Compliance

Google Cloud

# Which cloud?

- Since 2006
  - IaaS Foundation
  - 175+ services
  - Account governance
- 

- PaaS and Enterprise focus
  - Advanced tooling and management
  - Subscription based governance
  - Leverages Identity for O365 and Teams
- 

Google Cloud

- Compute, AI and Search focused
  - Innovation and Open Source
  - Containers and Kubernetes
- 

Other

- IBM, VM Ware, Alibaba, etc.

# Azure DevOps vs. Github

## Azure DevOps

- Microsoft Team Services
- Enterprise focus
- Private repos by default
- One-stop-shop

Repos, Boards, Pipelines

Artifacts, Testing

## Github

- Open Source favorite
- Community focus
- Public repos by default
- New capabilities
  - Actions
  - Boards
